SAFETY DATA SHEET  
according to Regulation (EC) No. 1907/2006

---

**SDS # : 089791**

**LIQUIFIED NATURAL GAS (LNG)**

**Date of the previous version: 2019-11-18**  
**Revision Date: 2020-05-27**  
**Version 1.01**

---

### Section 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

**1.1. Product identifier**

**Product name**  
LIQUIFIED NATURAL GAS (LNG)

**REACH Registration Name**  
This substance is exempt from registration according to Regulation (EC) No. 1907/2006 (REACH).

**Substance/mixture**  
Substance

**1.2. Relevant identified uses of the substance or mixture and uses advised against**

**Identified uses**  
Fuel.

**1.3. Details of the supplier of the safety data sheet**

**Supplier**  
TOTAL MARINE FUELS GLOBAL SOLUTIONS  
182 Cecil Street  
#27-01 Frasers Tower  
Singapore 069547  
Tel: +65 6849 5266  
Fax: +65 6337 9483

**For further information, please contact:**

**Contact Point**  
HSE

**E-mail Address**  
rm.mkefr-fds@total.com

**1.4. Emergency telephone number**

Emergency telephone: +44 1235 239670

See section 16 for additional information

---

### Section 2: HAZARDS IDENTIFICATION

**2.1. Classification of the substance or mixture**

**REGULATION (EC) No 1272/2008**

*For the full text of the H-Statements mentioned in this Section, see Section 2.2.*

**Classification**

- Flammable gases - Category 1 - (H220)
- Gases under pressure - Liquefied gas - (H281)
2.2. Label elements

Labelled according to REGULATION (EC) No 1272/2008

EC-No 232-343-9

Hazard pictograms

Signal word
DANGER

Hazard Statements
H220 - Extremely flammable gas
H281 - Contains refrigerated gas; may cause cryogenic burns or injury

Precautionary Statements
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking
P282 - Wear cold insulating gloves and either face shield or eye protection
P336 - Thaw frosted parts with lukewarm water. Do not rub affected area
P315 - Get immediate medical advice/attention
P377 - Leaking gas fire: Do not extinguish, unless leak can be stopped safely
P381 - In case of leakage, eliminate all ignition sources
P403 - Store in a well-ventilated place

2.3. Other hazards

Physical-Chemical Properties
Extremely flammable.
Accidental intense heating (in case of fire for example) of a container filled with this gas can lead to bursting and spreading of the product whose vapours may ignite causing deflagration or explosion.
Vapors may be heavier than air and may spread along the ground, then they gradually disperse.

Properties Affecting Health
In the gaseous phase: may have a slight anaesthetic effect and/or an asphyxiating effect as it reduces the oxygen content in the air. Contact with product may cause frostbite.

Section 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substance

Chemical nature Natural gas, gaseous hydrocarbon C1-C4.

For the full text of the H-Statements mentioned in this Section, see Section 16.

Section 4: FIRST AID MEASURES

4.1. Description of first-aid measures

General advice
IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR EMERGENCY MEDICAL CARE.
Remove casualty to fresh air as quickly as possible.
Cut off the electric power supply if this operation causes no sparks in the area containing vapors from the product.
Turn off the valves of the container or storage.
Ensure adequate ventilation and check that a safe, breathable atmosphere is present before entry into confined spaces.

Eye contact
Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes.
Consult a physician. Early ophthalmologic evaluation is recommended in case of cold burns to the eyes.

Skin contact
Treat more severe cold burns in the same manner as thermal burns.
Wash off immediately with plenty of water for at least 15 minutes. Immediately remove all stained or splashed clothing that is not adhering to the skin.
Do not attempt to warm up the affected parts directly (friction, warm bath...).
Seek medical attention in all cases of serious burns. In this case, the casualty should be sent immediately to hospital.

Inhalation
In case of exposure to intense concentrations of vapours, fumes or spray, transport the person away from the contaminated zone, keep warm and allow to rest.
If symptoms persist, call a physician. Artificial respiration and/or oxygen may be necessary.

Ingestion
Not an expected route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

Eye contact
Direct contact with liquefied gas can result in eye burns.

Skin contact
Contact with product may cause frostbite.
SDS #: 089791
LIQUIFIED NATURAL GAS (LNG)
Revision Date: 2020-05-27
Version 1.01

Inhalation
Vapors may cause drowsiness and dizziness. Symptoms of overexposure are dizziness, headache, tiredness, nausea, unconsciousness, cessation of breathing.

Ingestion
Not an expected route of exposure.

4.3. Indication of any immediate medical attention and special treatment needed
Notes to physician
Treat symptomatically.

Section 5: FIRE-FIGHTING MEASURES

5.1. Extinguishing media
Suitable Extinguishing Media
Dry powder. Carbon dioxide (CO₂). Foam.

Unsuitable Extinguishing Media
Do not use a solid water stream as it may scatter and spread fire.

5.2. Special hazards arising from the substance or mixture
Special Hazard
It is dangerous to extinguish a burning flame if it is impossible to stop the leak rapidly. Extinction of the flame should only be carried out by closing off the valve, in situations where this is possible. Accidental intense heating (in case of fire for example) of a container filled with this gas can lead to bursting and spreading of the product whose vapours may ignite causing deflagration or explosion. Incomplete combustion and thermolysis may produce gases of varying toxicity such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled in confined spaces or at high concentration.

5.3. Advice for fire-fighters
Special protective equipment for fire-fighters
Use water curtains to protect the personnel. In case of a large fire or in confined or poorly ventilated spaces, wear full fire resistant protective clothing and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Other information
Cool down any tanks and surfaces exposed to fire by spraying abundantly with water. Remove combustible material and, if possible, all exposed reservoirs.

Section 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures
General Information
Evacuate personnel to safe areas. Establish a security perimeter. Alert emergency personnel. Shut off the gas supply. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop all work that requires a naked flame, stop all vehicles, stop all machines and equipment that may cause sparks or flames. Cut off the electric power supply if this operation causes no sparks in the area containing vapors from the product. VENTILATE EXTENSIVELY. Remove combustible material and, if possible, all exposed reservoirs. If the product is leaking in two phases, avoid skin contact with the liquid product.
SDS #: 089791

LIQUIFIED NATURAL GAS (LNG)

Revision Date: 2020-05-27

Do not stay in the gas cloud, stay upwind of the source.
The cloud of steam can have a whitish fog may disappear depending on the humidity of the air appearance. Ensure that there is no remaining risk before resuming normal operations.

Advice for non-emergency personnel
Immediately evacuate personnel to safe areas. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).
For personal protection see section 8.

Advice for emergency responders
Take all appropriate steps to avoid fire, explosion and inhalation hazards to the rescuers including the use of breathing apparatus.
Use personal protective equipment: Work helmet with face shield and neck cloth (full head protection), Impervious gloves and boots, Coverall (with trousers legs over boots). These should be made of infusible and fireproof material.
Remove all sources of ignition.

6.2. Environmental precautions

General Information
Prevent entry into waterways, sewers, basements or confined areas.
Local authorities should be advised if significant spillages cannot be contained. See Section 12 for additional Ecological Information.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up
In case of a leak with no fire, stop the leak by closing the valve. Stop leak if you can do it without risk.
Ensure adequate ventilation.

6.4. Reference to other sections

Personal Protective Equipment
See Section 8 for more detail.

Waste treatment
See section 13.

Section 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Advice on safe handling
This gas is produced, stored, transported and distributed UNDER PRESSURE AS A LIQUID. Under normal conditions of distribution, it is never handled directly because it is continuously confined in closed systems until its final destruction by combustion during use.
FIRST PRECAUTIONS CONSIST IN ENSURING IT IS CAREFULLY CONFINED.
Ensure adequate ventilation. Keep away from heat, sparks and open flame. No smoking.
Take precautionary measures against static electricity.
Never weld a gas container.
NEVER UNDERTAKE ANY OPERATION THAT MAY AFFECT THE SAFE CONTAINMENT OF THE FIXED STORAGE TANKS OR CONTAINERS.
The inspection, cleaning and maintenance of storage containers require the application of strict procedures and must be entrusted to qualified personnel (internal or external). For personal protection see section 8.

Technical measures
Ensure adequate ventilation.
Design installations (machinery and equipment) to prevent burning product from spreading
Prevention of fire and explosion

Do not smoke.
All transfers, loading and unloading from vehicles must be carried out only by specifically trained personnel and in compliance with applicable procedures.
Design installations to avoid the possibility of the gas accumulating. Never heat a tank, a bottle or pipes holding gas with an open flame.

Hygiene measures

Do not smoke.
Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Technical measures/Storage conditions
STORE THIS GAS IN COMPLIANCE WITH APPLICABLE REGULATIONS, AS APPROPRIATE FOR THE TYPE OF STORAGE USED AND THE QUANTITIES STORED.
. All the electric installations, including the lighting of rooms that may contain this product, must be adapted to the risk area, in compliance with the European ATEX directives.
. Take precautionary measures against static discharges.
. Do not store near combustible materials /oxidizing materials.

Materials to Avoid
Strong oxidizing agents. Halogens.

Packaging material
Use only bottles and tanks that comply with regulations for pressure devices or cryogenic equipment, intended for this gas.

7.3. Specific end uses

Specific use(s)
No information available.

Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters

Exposure limits
Ingredients with workplace control parameters

Other constituents required for disclosure

Legend
See section 16

8.2. Exposure controls

Occupational Exposure Controls

Engineering Measures
When working in confined spaces (tanks, containers, etc.), ensure that there is a supply of air suitable for breathing and wear the recommended equipment.
Do not enter empty storage tanks until measurements of available oxygen have been carried out.
Personal Protective Equipment

**General Information**
Protective engineering solutions should be implemented and in use before personal protective equipment is considered.

**Respiratory protection**
Maintain adequate ventilation.

. In an emergency or for exceptional short-lasting jobs in an atmosphere polluted by the product, it is necessary to wear protective respiratory equipment: Wear self-contained breathing apparatus.

**Eye Protection**
If splashing is likely, full head and face protection (protective shield and/or safety goggles) should be used. (EN 166).

**Skin and body protection**
Wear cold insulating gloves/face shield/eye protection.
. Face shield, protective clothing, as applicable, and anti-static safety boots.

**Hand Protection**
Cold insulating gloves.

Environmental exposure controls

**General Information**
No information available.

Section 10: STABILITY AND REACTIVITY

10.1. Reactivity

General Information

No information available.

10.2. Chemical stability

Stability

Stable under recommended storage conditions.

10.3. Possibility of hazardous reactions

Hazardous Reactions

Rapid Phase Transition when exposed to water (RPT).

10.4. Conditions to avoid

Conditions to avoid

Keep away from open flames, hot surfaces and sources of ignition.
Take precautionary measures against static discharges.

10.5. Incompatible materials

Materials to Avoid

Strong oxidizing agents, Halogens.

10.6. Hazardous Decomposition Products

Hazardous Decomposition Products

None under normal use.

Section 11: TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects

Acute toxicity  Local effects Product Information

Skin contact

This substance does not meet the EU criteria for classification.
SDS #: 089791

LIQUIFIED NATURAL GAS (LNG)

Revision Date: 2020-05-27

Version 1.01

Contact with product may cause frostbite.

**Eye contact**
This substance does not meet the EU criteria for classification. Direct contact with liquefied gas can result in eye burns.

**Inhalation**
This substance does not meet the EU criteria for classification. Vapors may cause drowsiness and dizziness. Symptoms of overexposure are dizziness, headache, tiredness, nausea, unconsciousness, cessation of breathing.

**Ingestion**
This substance does not meet the EU criteria for classification. Not an expected route of exposure.

**Sensitization**
This substance does not meet the EU criteria for classification.

**Specific effects**

**Carcinogenicity**
This substance does not meet the EU criteria for classification.

**Mutagenicity**
This substance does not meet the EU criteria for classification.

**Germ Cell Mutagenicity**
This substance does not meet the EU criteria for classification.

**Reproductive toxicity**
This substance does not meet the EU criteria for classification.

**Repeated dose toxicity**

**Target Organ Effects (STOT)**

**Specific target organ systemic toxicity (single exposure)**
This substance does not meet the EU criteria for classification.

**Specific target organ systemic toxicity (repeated exposure)**
This substance does not meet the EU criteria for classification.

**Aspiration toxicity**
This substance does not meet the EU criteria for classification.

**Other information**
No information available.

### Section 12: ECOLOGICAL INFORMATION

#### 12.1. Toxicity

Not classified.
Acute aquatic toxicity - Product Information
Not applicable.

Acute aquatic toxicity - Component Information
No information available.

Chronic aquatic toxicity - Product Information
Not applicable.

Chronic aquatic toxicity - Component Information
No information available.

Effects on terrestrial organisms
No information available.

12.2. Persistence and degradability

General Information
Product is biodegradable

12.3. Bioaccumulative potential

Product Information
The potential for bioaccumulation of the product in the environment is very low.

logPow <= 2.8

Component Information

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>log Pow</th>
</tr>
</thead>
<tbody>
<tr>
<td>Natural gas - 8006-14-2</td>
<td>2.8</td>
</tr>
</tbody>
</table>

12.4. Mobility in soil

General Information
Due to its high volatility, this gas is unlikely to generate soil or water pollution.

Air
Released into the atmosphere, constituents are rapidly diluted and undergo photodegradation.

12.5. Results of PBT and vPvB assessment

PBT and vPvB assessment
This substance is considered not to be PBT and vPvB.

12.6. Other adverse effects

General Information
No information available.

Section 13: DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods
Waste from Residues / Unused Products
If elimination of gas in containers or tanks is required, combustion with the aid of appropriate equipment (flare) is the most reliable method. This operation must be carried out only by specifically trained personnel and in accordance with appropriate procedures.

Contaminated packaging
Empty containers may contain flammable or explosive vapors.

EWC Waste Disposal No.
According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user based on the application for which the product was used.

### Section 14: TRANSPORT INFORMATION

Section 15: REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

European Union

REACH
This substance is exempt from registration according to Regulation (EC) No. 1907/2006 (REACH).

International Inventories

The substance is listed or exempted from listing in the following inventories:
- Europe (EINECS/ELINCS/NLP)
- U.S.A. (TSCA)
- Canada (DSL/NDSL)
- China (IECSC)
- Korea (KECL)
- Australia (AICS)
- New Zealand (NZIoC)

Further information

No information available

15.2. Chemical Safety Assessment

Risk management measures and safety conditions of use are included in the relevant sections of the SDS

Section 16: OTHER INFORMATION

This safety data sheet complies with the requirements of Regulation (EC) No. 1907/2006

This safety data sheet serves to complete but not to replace the technical product sheets. The information contained herein is given in good faith and is accurate to the best of knowledge at the date indicated above. It is understood by the user that any use of the product for purposes other than those for which it was designed entails potential risk. The information given herein in no way dispenses the user from knowing and applying all provisions regulating his activity. The user bears sole liability for the precautions required when using the product. The regulatory texts indicated herein are intended to aid the user to fulfill his obligations. This list is not to be considered complete and exhaustive. It is the user’s responsibility to ensure that he is subject to no other obligations than those mentioned.

End of the Safety Data Sheet
